

# Measurable Progress

Bring greater objectivity and long-term developmental insights into autism care.

EarliPoint helps ABA and autism service providers incorporate objective developmental measurement into initial assessment, treatment planning, reassessment, and outcomes tracking workflows. Using FDA-cleared eye-tracking biomarker technology, providers can gather objective developmental data to support more informed clinical decision-making and communicate progress with greater confidence over time.

## BENEFITS FOR ABA & AUTISM SERVICE PROVIDERS

### Establish Objective Baselines

Anchor every new patient with measurable developmental data.

### Surface Strengths and Needs

Gain insights into developmental strengths and areas of need.

### Inform Treatment Planning

Support treatment planning and care pathway decisions.

### Conduct Reassessments

Support reauthorization and progress reviews with repeatable measures.

### Track Change Over Time

Longitudinal measures show developmental trajectories.

### Complement Existing Tools

Fits alongside the workflows and assessments you already use.

### Streamline Reassessment

Support more objective, scalable reassessment processes.

### Communicate Clearly

Share outcomes and progress with parents and payers.

### Differentiate Your Organization

Lead with innovative, research-backed technology.

## Designed for Real-World Autism Care

### Workflow-Ready

Integrates into existing provider processes.

### Clinician-Complementary

Does not replace judgment or established assessment practices.

### End-to-End Measurement

Assessment, reassessment, and outcomes tracking.

## Move Toward More Objective, Scalable Measurement

As providers face increasing pressure to demonstrate outcomes, standardize care, and support reauthorization processes, EarliPoint helps organizations move toward more objective and scalable developmental measurement built on more than 20 years of research and FDA-cleared biomarker technology.

**FDA-Cleared**
