

Understand Your Child's Development. **Track Change Over Time.**

Objective developmental insights gathered through an **FDA-cleared eye-tracking** assessment can help families understand where their child is today and how they are progressing over time.

WHAT EARLIPOINT CAN HELP YOU UNDERSTAND

Know Where You Are Today

Establish an objective developmental baseline and better understand your child's strengths and areas of need.

Track Changes Over Time

Repeat assessments provide a consistent way to observe developmental change and progress.

Visualize Progress

See developmental information in a clear, easy-to-understand format that supports meaningful conversations.

Inform Next Steps

Use objective insights to help guide discussions with your care team about goals, services, and future planning.

A CLEARER PICTURE OF PROGRESS

Every child develops at their own pace. EarliPoint helps families move beyond snapshots in time by providing objective developmental insights that can be tracked throughout the care journey.

Earlier Answers. **Measurable Progress.**

Ask your care team how EarliPoint can support your child's developmental journey.

The EarliPoint Assessment device is indicated as a tool to aid qualified clinicians in the diagnosis and assessment of Autism Spectrum Disorder (ASD) in children ages 16 months through 95 months (7 years) who are at risk based on concerns identified by a parent, caregiver, or healthcare provider (Not for direct consumer purchase; clinician use only).
